

President Barack Obama and His Portrait in 3D And what else is behind the sculpture?

President Obama is the first US president in history to get his portrait made via 3D printing technology. The plastic sculpture is no different from normal clay/stone statues.

Through the years I analyzed a lot of people. If it was in person, on video, television, picture and even paintings. This 3D image is new and I can add it to the list.

The Goodfield Method is an unique method of analyzing verbal- and nonverbal behavior. My method has helped many leaders in industry, government, human resources, mental health professionals, law enforcement and intelligence agencies to become more efficient and effective agents to change.

The Goodfield Method teaches us how the unconscious mind can be seen and understood on all levels of human experience.

Unconscious messages from the body can, in fact, be seen through uncontrollable Non-Verbal Leak (explained in detail in next section), which manifest in a person's facial expressions or mannerisms. Because this "leak" comes from the unconscious, there is absolutely no way an individual can control, modify or prevent its appearance. Accordingly, these signs are consistent, repeatable, and predictable.

Whether in the boardroom or through personal interactions, our lives are profoundly influenced by the unconscious messages we send through our nonverbal behavior. The Goodfield Method explains:

- How to recognize the Non-Verbal Leak,
- How to analyze the meaning and significance of the Leak, and
- The appropriate actions to take regarding this information.

Some practical examples include:

- In therapy, a practitioner would utilize The Goodfield Method to quickly determine a specific problem area that needs work.
- In business, an executive would utilize The Goodfield Method to better understand and deal with employee and productivity issues, or use the insights gained from an adversary's leak during a difficult negotiation.
- In personnel selection, the interviewer gets a clearer understanding of the candidate and, therefore, significantly increases the probability of getting the right person for the right job.
- In law enforcement, The Goodfield Method can be used to tell if a suspect is lying or withholding information.
- In personal coaching a quick analyze of the Goodfield Personality Type helps to develop a coaching plan aimed to the person.

Over the years unique and distinctive patterns of response have resulted in research and development of 12 Goodfield Personality Types. Each unique personality category have been given a name that closely reflects their general way of doing business. With the help of these categories, we can accurately predict human behavior and interpersonal interaction.

Now back to the President.

In Goodfield Personality terms he is “The Inquisitor”.

Important personality factors are that he is intense, focused, distrusting, arrogant, tough, relentless questioner, power to influence, determined, persuasive, attracted to power, self-concept is that of a “winner”, often hostile, history of risk taking, can be explosive, intelligent, street smart, self-assured, strong, quintessential leader and is comfortable in leadership positions.

The statement of his basic strategy on a symbolic level is:

I will look, reflect, hold in, position myself and then speak what I think I feel. I think my feelings that help me manage pain and anger.

There is so much more to tell about him. I analyzed him in my book [So you want to be my President?](#)

In several articles : [The Sins of the Father - A Revolutionary Gift](#) and [Ukraine’s Game: Obama’s Checkers vs. Putin’s Chess.](#)

And on television [Goodfield interview Inside Arizona Business](#)
