

A message from Ben and me!

Please take a second and exercise your right tomorrow! We will decide whether or not good old Ben Franklin will fly from our wallets or purses and our economy tumble or thrive.

I've been a professional change agents around the world for many years. I can say with my experience that one of the greatest things that people have in a democracy is the ability to adapt and adjust in some of the most challenging times.

Regardless of whether Pres.Trump or VP Biden will have the helm of America's Ship of State for the next four years, we will continue to grow as people and a nation. Tomorrow will determine the direction and speed. Please keep this in mind!

I have traveled much of our world for decades and have seen how many people lived or struggled. I have seen the consequences and met with people who did not have the right to make their choices known.

It is a fact, that many people have given their lives to give us the right to make our choices clear at a ballot box tomorrow.

If you read this message more than likely you're one of my friends who really need no reminder about the importance of the freedom that we have to vote.

Put on your mask and go to your local voting location and let your wishes be known. Victory is a decision made prior to winning. NEXT - now onward to "Bright and Sunlit Upland's" as Churchill said!

Your Ben Franklin's will thank you. Vote!
